

History & Archives report 5/21/2020

National office is setting up Verint Community software project to assist & capture USMS history. The Living History project is getting started with oral & written histories. Including photos, movies & videos.

USMS has photo, video and archive capabilities in place already. The LMSC's are being contacted to be able to setup sharing of local information, history and media. The USMS National office doesn't have a place for this type of content to be shared, though it is being archived appropriately along with all of the national content.

I'm still compiling a list of SPMA/SPMS officers. I'm looking for more SPMS information from before 1986.
